SUBJECT INDEX

Aminoglutethimide
  in bone metastases, 693
Androgen(s)
  biosynthesis of, by the human testis *in vitro*, 191
  inheritance of, program of male-specific expression on unusual estrogen-binding protein, in rat liver, 155
Androgen insensitivity syndrome
  complete, associated with a *de novo* mutation of the androgen receptor gene, 211
Androstenedione
  effect of, on growth of untransfected and aromatase-transfected MCF-7 cells in culture, 611
5-Androstene-3β,17α-diol
  secretion of, by the human testis, 171
Aromatase
  action of endogenous steroid inhibitors of brain, relative to fadrozole, 641
  activity and the effect of estradiol and testosterone on DNA synthesis in endometrial carcinoma cell lines, 661
  activity in the rat brain, 499
  a detailed molecular model for human, 399
  brain, and the control of male sexual behavior, 521
  competitive product inhibition of, by natural estrogens, 651
  control of, activity in breast cancer cells, 589
  distribution of, activity in cultured neurons and glia cells, 637
  factors influencing, activity in the breast, 597
  gene expression
    analysis of human placental, deficiency, 331
    diverse mechanisms of control of, 341
    regulation of, in ovarian granulosa cells and R2C Leydig cells of the rat, 429
    tissue-specific promoters regulate, 321
  influence of, on proliferation of endometrial cancer cells, 463
  inhibition of human, by mammalian lignans and isoflavonoid phytoestrogens, 147
  inhibition of human placental, with 3-deoxy- and 6-oxo-steroids, 199
  inhibitors
    A-ring bridged steroids as potent, 409
    Atamestane: an, for the treatment of benign prostatic hyperplasia, 565
    biological characterization of A-ring steroids, 623
    growth suppression of MCF-7 human breast cancer cells by, 667
    management of benign prostatic hyperplasia with particular emphasis on, 557
    ORG 33201: a new highly selective orally active, 681
    pharmacology of vorozole, 617
    structure–activity relationships and binding-model of novel, 421
    substituted 1-[(benzofuran-2-yl)-phenylmethyl]-imidazoles as potent, *in vitro* and in female rats *in vivo*, 675
  in the human testis, 549
  local, activity in human breast tissues, 577
  local regulation of primate granulosa cell, activity, 435
  mechanism of human placental, 389
  mechanistic studies on, and related C—C bond cleaving *P*-450 enzymes, 375
  molecular and cellular physiology of, in the brain and retina, 541
  multiple functions of, and the active site structure, 469
  neuromodulator in the control of behavior, 509
  prognostic significance of, in human breast cancer, 583
  regulation of the, activity of human placental cytotrophoblasts by insulin, IGF-I and IGF-II, 449
  relationship between, activity and steroid receptor levels in ovarian tumors from postmenopausal women, 657
  steroidal inhibitors as chemical probes of the active site of, 357
  structure–function studies of human, 347

studies on the mechanism of, and other cytochrome *P*450 mediated deformylation reactions, 367
Atamestane
an aromatase inhibitor for the treatment of benign prostatic hyperplasia, 565
inhibition by, of testosterone synthesis in the human testis, 287
Azasteroids
inhibitors of testosterone 5α-reductase in mammalian skin, 121

Benign prostatic hyperplasia
effects of estrogen deprivation on, in human, 573
management of, with particular emphasis on aromatase inhibitors, 557
treatment of, by Atamestane: an aromatase inhibitor, 565
Bone metastases
aminoglutethimide and hydrocortisone in, 693
Brain
action of endogenous steroid inhibitors of, aromatase relative to fadrozole, 641
Breast
factors influencing aromatase activity in the, 597
Breast cancer
effects of long-term fadrozole hydrochloride treatment in patients with advanced stage, 683
efficacy of CGS 20267 in suppressing estrogen biosynthesis in patients with advanced stage, 687
local aromatase activity in human, tissues, 577
MCF-7, in nude mice as a model for evaluating aromatase inhibitors, 671
prognostic significance of aromatase and estrone sulfatase enzymes in human, 583
Breast cancer cells
control of aromatase in, and its importance for tumour growth, 605
MCF-7
effect of a population of triphenylethylenes on, 239
in nude mice as a model for evaluating aromatase inhibitors, 671
interaction of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, 12-*O*-tetradecanoyl-phorbol-13-acetate and 17β-estradiol in human, 251
receptor binding and biological effects of three ^{125}I-iodinated estrogen derivatives in, 105
role of cytokines and growth factors in the control of aromatase activity in, 589

CGS 20267
efficacy of, in suppressing estrogen biosynthesis in patients with advanced stage breast cancer, 687
Congenital adrenal hyperplasia
kinetics and metabolism of 11-deoxycortisol in a patient with, due to 11β-hydroxylase deficiency, 29
Corticosteroid(s)
side chain oxidations: formation of steroid 21-oic acids by rabbit liver cytosol, 305
Cytochrome *P*-450
role of, in oxidative metabolism of testosterone and benzphetamine in human adult and fetal liver, 61
-linked monooxygenase system in adult rat brain, 163
studies on the mechanism of aromatase and other, -mediated deformylation reactions, 367
Cytokines
role of, and growth factors in the control of aromatase activity in breast cancer cells, 589

Dexamethasone
modulation of interleukin-5 gene expression in T-lymphocytes by, 203
Diethylstilbestrol
altered patterns of proteins released *in vitro* from oviductal and uterine tissue from adult female mice treated neonatally with, 227
DNA
effects of 3-aminobenzamide on, in mouse thymocytes, 113
sequencing and expression of (3-17)β-hydroxysteroid dehydrogenase from *Pseudomonas testosteroni*, 133
aromatase activity and the effect of estradiol and testosterone on, synthesis in endometrial carcinoma cell lines, 661

Endometrial cancer
aromatase activity and the effect of estradiol and testosterone on DNA synthesis in, cell lines, 661
influence of aromatase on proliferation of, cells, 463

Epitestosterone
secretion of, by the human testis, 171
Estradiol
generation of, within the pregnant guinea pig uterine compartment, 291
interactions between, -17β, FSH, and transforming growth factor-β regulate growth and differentiation in the rat gonad, 441
Estrogen(s)
production by fetal rat gonads, 463
productivity of endometrium and endometrial cancer tissue, 459
Estrone sulfatase
prognostic significance of, enzymes in human breast cancer, 583
Exemestane
as an aromatase inhibitor with tamoxifen on DMBA-induced mammary tumors in rats, 677

Fadrozole
effects of long term hydrochloride treatment in patients with advanced stage breast cancer, 683
FSH
interactions between, estradiol-17β and transforming growth factor-β regulate growth and differentiation in the rat gonad, 441

Gene
complete androgen insensitivity syndrome associated with a *de novo* mutation of the androgen receptor, 211
regulation of the rat aromatase, in ovarian granulosa cells and R2C Leydig cells, 429
Gene expression
diverse mechanisms of control of aromatase, 341
of steroid receptor fragments, 1
sex hormones and dexamethasone modulate interleukin-5, in T-lymphocytes, 203
testosterone regulates mitochondrial aspartate aminotransferase, in prostate, 13
tissue-specific promoters regulate aromatase cytochrome *P*-450, 321
Growth factors
role of, in the control of aromatase activity in breast cancer cells, 589

11β-Hydroxylase deficiency
in a patient with congenital adrenal hyperplasia, 29
3β-Hydroxysteroid dehydrogenase
cloning, DNA sequencing and expression of, from *Pseudomonas testosteroni*, 133
25-Hydroxyvitamin D_3
enzyme immunoassay for plasma, employing immunoaffinity chromatography as a pretreatment method, 93

Insulin
regulation of the aromatase activity of human placental cytotrophoblasts by, 449
Insulin growth factor (IGF)
regulation of the aromatase activity of human placental cytotrophoblasts by, -I and -II, 449
Interleukin-5
sex hormones and dexamethasone modulate, expression in T-lymphocytes, 203

Leydig cells
regulation of the rat aromatase gene in R2C, 429
Lymphocytes
pseudoaromatase in circulating, 647
sex hormones and dexamethsone modulate interleukin-5 expression in T-, 203
MCF-7 breast cancer cells
effect of androstenedione on growth of untransfected and aromatase transfected, in culture, 611
effect of a population of triphenylethylenes on, 239
growth suppression of human, by aromatase inhibitors, 667
in nude mice as a model for evaluating aromatase inhibitors, 671

interaction of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, 12-*O*-tetradecanoyl-phorbol-13-acetate and 17β-estradiol in human, 251
receptor binding and biological effects of three ^{125}I-iodinated estrogen derivatives in, 105

Neurons and glia cells
distribution of aromatase activity in culture, 637
Non-steroidal aromatase
anti-tumor and endocrine effects of, inhibitors on estrogen-dependent rat mammary tumors, 633

ORG 33201
a new highly selective orally active aromatase inhibitor, 681

Phytoestrogens
inhibition of human aromatase by mammalian lignans and isoflavonoid, 147
Pituitary tumor
changes in population density elicit quantitative and qualitative changes in the estrogen receptor in intact GH_4C_1, cells, 53
Placenta
pathway and kinetics of prednisolone metabolism in the human, 315
mechanism of human, aromatase, 389
Prednisolone
pathway and kinetics of, metabolism in the human placenta, 315
Pregnane(s)
novel oxidative cleavage of C_{17}–C_{20} bond in, by a *Pseudomonas* Sp., 101
Primary biliary cirrhosis
sex hormone binding globulin and non-protein-bound oestradiol in postmenopausal patients with, 273
Probes
steroidal inhibitors as chemical, of the active site of aromatase, 357
Progestin metabolizing enzyme
activities of, in pituitary, hypothalamus and brain during lactation, 299
Progesterone
metabolism, in human parotid and submandibular salivary glands *in vitro*, 69
Pro-opiomelanocortin-derived peptides
effects of, on adrenal steroidogenesis in guinea-pig adrenal cells, 77
Prostate
testosterone regulates mitochondrial aspartate aminotransferase gene expression and mRNA stability in, 13
Protein(s)
effect of diethylstilbestrol on, released *in vitro* from oviductal and uterine tissue from adult female mice, 227
Protein kinase C
relative involvement of, in the cytotoxic action of a population of triphenylethylenes on MCF-7 cells, 239
Pseudoaromatase
in circulating lymphocytes, 647

Rat mammary tumor
anti-tumor and endocrine effects of non-steroidal aromatase inhibitors on estrogen-dependent, 633
mRNA
testosterone regulates mitochondrial aspartate aminotransferase gene expression and, stability in prostate, 13
Receptor(s)
androgen(s)
complete androgen insensitivity syndrome associated with a *de novo* mutation of the, gene detected by single strand conformation polymorphism, 211
corticotropin
identification and characterization of, in bovine and human adrenals, 21
estrogen(s)
characterization of rat uterine, *in vivo*, 277

changes in population density elicit quantitative and qualitative changes in the, in intact GH_4C_1 pituitary tumor cells, 53
glucocorticoid
binding affinities of mometasone furoate and related compounds including its metabolites for the, of rat skin tissue, 141
binding of RU486 and deacylcortivazol to the, is insensitive to sulfhydryl modifying agents, 217
mineralocorticoid
in SV40-transformed tubule cell lines derived from rabbit kidney, 45
progesterone
dimerization of the RU486-bound calf uterine, 39
steroid
expression and functional analysis of, fragments secreted from *Staphylococcus aureus*, 1
relationship between aromatase activity and, levels in ovarian tumors from postmenopausal women, 657

RU486
binding of, to the glucocorticoid receptor, 217
dimerization of the, -bound calf uterine progesterone receptor, 39

Sertoli cells
β-adrenoceptor mediated responses and subtypes of β-adrenoceptors in cultured rat, 85
Sex hormone binding globulin
and non-protein-bound oestradiol in postmenopausal patients with primary biliary cirrhosis, 273
Steroid(s)
biological characterization of A-ring, 623
receptors
expression and functional analysis of, fragments secreted from *Staphylococcus aureus*, 1
relationship between aromatase activity and, levels in ovarian tumors from postmenopausal women, 657

Tamoxifen
inhibitory effect of combined treatment with the aromatase inhibitor exemestane and, on DMBA-induced mammary tumors in rats, 677
Testis
aromatase in the human, 549
inhibition of testosterone synthesis in the human, by Atamestane, 287
Testosterone
azasteroids as inhibitors of, 5α-reductase in mammalian skin, 121
inhibition of, synthesis in the human testis by Atamestane, 287
long-term administration of, enanthate to normal men, 179
metabolism of, in human parotid and submandibular salivary glands, 69
regulation of mitochondrial aspartate aminotransferase gene expression and mRNA stability by, in prostate, 13
Thymocytes
3-aminobenzamide protects the mouse, *in vitro* from dexamethasone-mediated apoptotic cell death and cytolysis, 113
T-lymphocytes
sex hormones and dexamethasone modulate interleukin-5 gene expression in, 203
Transforming growth factor-β
interactions between FSH, estradiol-17β and, regulate growth and differentiation in the rat gonad, 441

Vitellogenin
synthesis in cultured hepatocytes, 263
Vorozole
pharmacology of, 617

We wish to express our deep thanks to the following persons for their kind collaboration in reviewing papers for *The Journal of Steroid Biochemisry and Molecular Biology*: Drs BARTLETT J., Edinburgh, Scotland; BURAS R. R., Washington, U.S.A.; CARLSTEDT-DUKE J., Huddinge, Sweden; CHENG K. C., New York, U.S.A.; FRETER C., Washington, U.S.A.; HAWKINS R. A., Edinburgh, Scotland; MANI S., Houston, U.S.A.; MILLER L. A., Denver, U.S.A.; MONDER C., New York, U.S.A.; NAHOUL K., Fresnes, France; SAEZ J., Lyon, France; SCHACHTER B., New York, U.S.A.; SIMARD J., Quebec, Canada; and LUU-THE V., Quebec, Canada.
